

Scale up soil monitoring with soil spectral libraries?

BDM: Biodiversity Monitoring Switzerland
(Federal Office for the Environment;
soil analysis: NABO, Agroscope)
– 1094 locations (one sampling event)

NABO: Swiss Soil Monitoring Network (NABO)
– 71 sites (subset of agricultural locations)

Sampling scheme
for a NABO site

- Sampling in 5 year intervals since 1985
- Area: 10m x 10m
- One to four spectral measurements per year (pooling replicate samples)
